

2020 AGM Motions Update

Motions Update

1. Beaminster & Bridport Town Council (changes in planning)

NALC response from the Policy Committee: NPPF and climate change – position already formally adopted at 12/1/21 Policy Cttee. session so it would be duplication for the committee to again consider a motion on the same topic. However, we will retain and use the excellent supporting data from DAPTC in our ongoing lobbying on the subject.

2. Bridport Town Council (funding following the impact of COVID-19)

NALC response from the Policy Committee: This is already national policy from a motion adopted by the committee last June, so can't be considered again as would be duplication. Please thank BTC for their excellent supporting data which we will cite and use in ongoing lobbying of government regarding COVID-19 support funding for local councils

3. Corfe castle Parish Council (parishes as statutory consultees - withdrawn)

Although withdrawn DAPTC committed to help parishes understand their role as statutory consultees and work with planning authorities to ensure misleading messages from officers didn't undermine parish roles. This is now integrated in the planning training offered by DAPTC. We continue to support parishes deliver more effective planning responses and concentrate parish time on the applications that have greater significance.

4. Loders parish Council

DAPTC has created a dedicated webpage to share the activities and best practise in support of the Climate and Biodiversity Emergency. Furthermore, it will consult with the membership a number of themed issues that might become central to its operations. This will get underway in early 2022.

5. Studland Parish Council

Letters written to the 8 Dorset MPs supporting the motion and lobbying on the proposed planning changes is already part of NALC's lobbying activities..
